PUBLIC HEALTH REPORTS.

UNITED STATES.

[Reports to the Surgeon-General United States Marine-Hospital Service.]

Withdrawal of restrictions against fruit ports provided with Service inspectors except Bocas del Toro and Port Limon.

MOBILE, ALA., October 17, 1901.

SIR: I beg to advise you that this board has withdrawn restrictions against passengers from all fruit ports at which Service inspectors are stationed, with exceptions of Bocas del Toro and Port Limon.

Respectfully,

HENRY GOLDTHWAITE,
Health and Executive Officer.

Yellow fever in Yucatan.

MOBILE, ALA., October 17, 1901.

SIR: For your information I beg to quote from a letter from our marine medical inspector on steamship *Normandie*, under date of 15th instant:

"I beg leave to report that from information gathered from sources which I consider reliable, yellow fever, to a degree greater than customary, is prevailing throughout Yucatan, and is now considered epidemic where before it was considered endemic—MERIDA.

"I was informed that this disease prevailing among the Yucatan Indians has been contracted by the Mexican troops sent to fight them, and in that way spread afar; that the Government can not fight its introduction into new loci because of the lack of railroad facilities, but that Progreso was safe.

"This information as to the spread of yellow fever was confirmed by the U. S. Marine-Hospital Service representative there, who added that the number of cases actually occurring at Progreso was not known, as the deaths only were reported."

Respectfully,

HENRY GOLDTHWAITE,
Health and Executive Officer.

Smallpox in Pennsylvania from August 27 to October 16, 1901.

PHILADELPHIA, PA., October 16, 1901.

SIR: Since my last report (August 27, 1901) smallpox has been reported in Pennsylvania as follows: Philadelphia, Philadelphia County, 135 cases, 18 deaths; Pottsville, Schuylkill County, 9 cases; Chester, Delaware County, 53 cases, 4 deaths; Erie, Erie County, 3 cases; New Castle, Lawrence County, 3 cases; Forksville, Sullivan County, 3 cases; Lebanon, Lebanon County, 22 cases; Shenandoah, Schuylkill County, 1 case; Tamaqua, Schuylkill County, 1 case;

Luzerne, Luzerne County, 1 case; Springtown, Bucks County, 10 cases; North Lebanon Township, Lebanon County, 1 case. Total, 242 cases and 22 deaths.

Respectfully,

BENJAMIN LEE, M. D.,
Secretary.

Arrival at Reedy Island Quarantine of vessels from West Indian and Mexican ports.

REEDY ISLAND QUARANTINE,
via Port Penn, Del., October 18, 1901.

SIR: Through the medical officer in command of national quarantine service on Delaware River and Bay, I have the honor to report the arrival at this station of the following vessels: October 6, 1901, Norwegian steamship *Helga*, from Castries, via Santiago de Cuba, with ore; no passengers; bill of health signed by Assistant Surgeon Von Ezdorf. October 10, British steamship *Mexicano*, from Tampico, in ballast; no passengers; bill of health signed by Acting Assistant Surgeon Gregory.

Respectfully,

T. F. RICHARDSON,
Assistant Surgeon, U. S. M. H. S., In Command.

Arrival at Baltimore of vessels from South American and West Indian ports.

BALTIMORE, MD., October 19, 1901.

SIR: I have to report the arrival at this port of the following-named vessels, from the ports named, for the week ended this day: October 14, British steamship *Croydon*, from Mollundo, Peru, cargo general. October 15, British steamship *Alabama*, from Daiquiri, Cuba, with ore. October 19, Norwegian steamship *Tyr*, from Daiquiri, Cuba, with ore.

Respectfully,

WM. F. STONE,
Collector.

REPORTS FROM THE MEXICAN BORDER.

El Paso, Tex., October 12, 1901.—Inspection service.—I have the honor to transmit herewith the summary of transactions at this station for the week ended October 12, 1901: Inspection Mexican Central Railroad passengers, 135; inspection special passengers from City of Mexico, 16; inspection Rio Grande and Pacific Railroad passengers, 21; inspection of immigrants, 121; disinfection of blankets, trunks, etc., 76; disinfection of soiled linen imported for laundry, 418 pieces; disinfection of Pullman soiled linen, 2,666 pieces; detained 1 passenger from Tampico four days, having no certificate from medical officers stationed there.

E. ALEXANDER,
Acting Assistant Surgeon, U. S. M. H. S.

FOREIGN AND INSULAR.

BRITISH HONDURAS.

Report from Belize—Fruit port.

BELIZE, BRITISH HONDURAS, *October 6, 1901.*

SIR: I have to make the following report of the conditions and transactions at this port during the week ended October 5, 1901:

Population, according to census of 1901, 9,114; present officially estimated population, 9,114. Number of cases and deaths from yellow fever during the week, none; number of cases and deaths from smallpox during the week, none; number of cases and deaths from typhus fever during the week, none; number of cases and deaths from cholera during the week, none; number of cases and deaths from plague during the week, none; number of deaths from other causes during the week, 6. Prevailing diseases, malarial in character. General sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following vessels: October 4, steamship *Esther*; crew, 19; passengers from this port, none; passengers in transit, none; pieces of baggage disinfected, none; steamship *Anselm*; crew, 43; passengers from this port, 4; passengers in transit, 4; pieces of baggage disinfected, 15. October 5, schooner *Davy Crockett*; crew, 6; passengers from this port, none; passengers in transit, none; pieces of baggage disinfected, none.

Respectfully,

J. GREY THOMAS,
Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

CANADA.

Inspection of immigrants at Quebec for the week ended October 12, 1901.

QUEBEC, CANADA, *October 12, 1901.*

SIR: I have the honor to report that for the week ended October 12, there were inspected 520 immigrants; passed, 514; detained, 6; cause of detention: Debility, 1; hernia, 2; paralysis of left arm, 1; trachoma, 2.

Respectfully,

VICTOR G. HEISER,
Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

CHINA.

Two cases of plague in Newchwang—Health rules issued by the Russian administration.

NEWCHWANG, CHINA, *August 31, 1901.*

SIR: I have the honor to report that the Russian civil administration yesterday notified the consular body that—

“A case of bubonic plague has been discovered among the Chinese population of this port.

"All necessary measures to prevent the spreading of this disease have been taken by medical authorities."

I have further the honor to inclose the civil administration's original proclamation in Chinese, with its interpretation on the subject of the plague.

It is very likely that the plague will be prevented from spreading, as the Russians will take great precautions.

On receipt of this notice I cabled Consul-General Goodnow, Shanghai, as follows:

"One case plague.—MILLER."

Since the above notice was received there has been 1 more case of plague discovered.

Respectfully,

HENRY B. MILLER,
United States Consul.

HON. ASSISTANT SECRETARY OF STATE.

[Inclosure—Translation.]

A. Ostroverkhov, imperial Russian civil administrator of the port of New Chwang and superintendent of customs, etc., hereby issues this proclamation for the information of all the people.

I discovered yesterday 2 diseased men of doubtful cases rather like plague which infested this port year before last. Plague, being a serious danger, is known to everybody. Over 3,000 men died by the disease here year before last, and now it is beginning again. The administration will at once take measures to prevent the spreading of this disease with the following rules:

1. All houses should be purely cleaned according to the rules of the health department.

2. Diseased men should be reported to the police station and examined by a doctor. They should be sent to the hospital if discovered with the plague.

3. The diseased's house will be washed with medicine and the furniture, clothes, etc., should be burned, the cost of which will be refunded by the public.

I, the civil administrator, hope that all the people and merchants of this port will give assistance to prevent the plague.

1. If anyone is attacked with the disease he must report at once.

2. *Coffin shops.*—All necessary information shall be procured from person buying coffins; his surname and the place where he lives must be given and reported to the police station.

3. All coffins with diseased persons should be buried at once, as it is not allowed to export dead bodies.

Let all, therefore, carefully obey the issuance of this proclamation. If anyone transgresses this, I will surely arrest and punish him severely without mercy.

A special proclamation issued this 16th day of 7th moon, 27th year of Kuang Hsu.

Report from Hongkong—Plague situation.

HONGKONG, CHINA, September 10, 1901.

SIR: I have the honor to forward herewith the abstract of bills of health issued during the week ended September 7: Two hundred and sixty-six individuals were bathed at the disinfecting station, 434 bundles of clothing and bedding and 2,666 pounds of human hair were disinfected by steam during the week. One steerage passenger was rejected because of fever.

Six cases of plague and 6 deaths were reported during the week, thus making a total of 1,729 cases and 1,628 deaths thus far this year. There were no other cases of communicable disease reported in the colony during the week.

Respectfully,

JOHN W. KERR,
Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

COLOMBIA.

*Prevalence of smallpox in Panama.*PANAMA, COLOMBIA, *September 28, 1901.*

SIR: I beg to say that for several months past there have been cases of smallpox in this city.

This fact has been promptly reported to the U. S. Marine-Hospital Service in Washington and noted on each bill of health given at this port

The gunboat *Ranger* and the battleship *Iowa* were advised of this immediately on their arrival at Panama.

The spread has been so great that I feel it my further duty to notify the department of the facts as they at present exist.

The doctors report to me that there are in the city something like from 100 to 150 cases, and that these are in private houses in various parts of the city, and no sign is placed there to indicate its presence. There are no efforts being made to control the spread of the disease.

I do not cable, because notice has heretofore been given as above stated.

Respectfully,

H. A. GUDGER,
United States Consul General.

Hon. ASSISTANT SECRETARY OF STATE.

*Report from Bocas del Toro—Fruit port.*BOCAS DEL TORO, COLOMBIA, *October 9, 1901.*

SIR: I have to make the following report of the conditions and transactions at this port during the week ended October 8, 1901:

Population according to census, not obtainable. Number of cases and deaths from yellow fever during the week, none; number of cases and deaths from smallpox during the week, none; number of cases and deaths from typhus fever during the week, none; number of cases and deaths from cholera during the week, none; number of cases and deaths from plague during the week, none; number of deaths from other causes during the week, 2. Prevailing diseases, malarial. Of the deaths reported above, 1 was from chronic malaria; the other reported as due to paralysis. General sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following vessels: October 2, steamship *Foxhall*; crew, 26; passengers from this port, none; passengers in transit, none; pieces of baggage disinfected, none. October 6, steamship *Banes*; crew, 16; passengers from this port, none; passengers in transit, none; pieces of baggage disinfected, none.

Respectfully,

PAUL OSTERHOUT,
Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

COSTA RICA.

*Report from Port Limon—Fruit port—Yellow fever.*PORT LIMON, COSTA RICA, *October 12, 1901.*

SIR: I have to make the following report of the conditions and transactions at this port during the week ended October 12, 1901:

Present estimated population, 4,000. Number of cases and deaths from

yellow fever during the week, 2 cases, 1 death; number of cases and deaths from smallpox during the week, none; number of cases and deaths from typhus fever during the week, none; number of cases and deaths from cholera during the week, none; number of cases and deaths from plague during the week, none; number of deaths from other causes during the week, 4. Prevailing diseases, malarial and yellow fevers. General sanitary condition of this port and the surrounding country during the week, not good. Since October 1, 6 cases of yellow fever and 1 death therefrom in Port Limon.

Bills of health were issued to the following vessels: October 6, steamship *Kitty*; crew, 19; passengers from this port, none; passengers in transit, none; pieces of baggage disinfected, none. October 7, steamship *Alene*; crew, 39; passengers from this port, 3; passengers in transit, 5; pieces of baggage disinfected, none. October 9, steamship *Brookline*; crew, 32; passengers from this port, none; passengers in transit, none; pieces of baggage disinfected, none; steamship *Ciudad de Cadiz*; crew, 92; passengers from this port, none; passengers in transit, 24; pieces of baggage disinfected, none. October 10, steamship *Columbia*; crew, 16; passengers from this port, none; passengers in transit, none; pieces of baggage disinfected, none. October 11, steamship *Breakwater*; crew, 36; passengers from this port, none; passengers in transit, none; pieces of baggage disinfected, none; steamship *Furnel*; crew, 48; passengers from this port, none; passengers in transit, none; pieces of baggage disinfected, none. October 12, steamship *Stillwater*; crew, 27; passengers from this port, none; passengers in transit, none; pieces of baggage disinfected, none.

Respectfully,

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

D. W. GOODMAN,

Acting Assistant Surgeon, U. S. M. H. S.

CUBA.

Reports from Matanzas, Cardenas, Isabela de Sagua, and Caibarien.

MATANZAS, CUBA, October 7, 1901.

SIR: Through the chief quarantine officer for the island of Cuba, I have the honor to transmit herewith the following sanitary report of the quarantine district under my command, for the week ended October 5, 1901:

Matanzas.—Fourteen deaths occurred in the city of Matanzas during the period covered by this report, showing a mortality of 16.13 per 1,000. The principal causes of death were as follows: Senility, 2; tuberculosis, 1; congenital debility, 1; drowning, 1; malarial fever, 1; enterocolitis, 1; heart disease, 1; arterio sclerosis, 1; tuberculous meningitis, 1; other causes, 4. One case of diphtheria was reported. Three vessels were inspected and passed on arrival and 1 passed without inspection. Six bills of health were issued to vessels leaving this port. Twenty-six health certificates were issued to persons leaving the island. Sixteen pieces of baggage were inspected and passed, and 18 pieces of baggage per steamship *Chalmette* were disinfected. The American steamship *Chalmette* bound for New Orleans, La.; the American schooner *Olover*, bound for Sabine, Tex., and the American schooner *Wave*, bound for Key West, Fla., were disinfected October 3, 4, and 5, 1901, respectively.

Cardenas.—Acting Asst. Surg. Enrique Saez reports that 8 deaths

occurred in Cardenas during the week, of the following causes : Cerebral hemorrhage, 2 ; tuberculosis, 1 ; nephritis, 1 ; tuberculous enteritis, 1 ; general debility in children, 1 ; other causes, 2. No case of infectious or contagious character was reported. The death rate during the week was 16.80 per 1,000. Ten vessels arrived during the week and were passed without inspection. Ten bills of health were issued to vessels leaving the port.

Isabela de Sagua.—Acting Asst. Surg. Pedro Garcia Riera reports that 2 vessels were inspected and passed on arrival and 11 vessels were passed without inspection. Ten bills of health were issued to vessels leaving the port.

Caibarien.—Acting Asst. Surg. Leoncio Junco reports that 1 death occurred in the municipal district of Caibarien during the week, from lack of development. The death rate was 6.03 per 1,000. No case of infectious or contagious character was reported. One vessel was inspected and passed on arrival and 13 vessels passed without inspection. Eight bills of health were issued to vessels leaving the port.

Respectfully,

G. M. GUITÉRAS,

Passed Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL, *U. S. Marine-Hospital Service.*

Inspection of immigrants at Matanzas during the week ended October 12, 1901.

MATANZAS, CUBA, *October 12, 1901.*

SIR: I herewith submit report of alien steerage passengers at this port during the week ended October 12, 1901: October 11, 1901, Spanish steamship *Riojano* from Vigo, Spain, with 1 immigrant.

Respectfully,

G. M. GUITÉRAS,

Passed Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL, *U. S. Marine-Hospital Service.*

Reports from Nuevitas, Puerto Padre, Gibara, and Baracoa.

NUEVITAS, CUBA, *September 30, 1901.*

SIR: Through the chief quarantine officer for the island of Cuba, I have the honor to submit the following report for the week ended September 28, 1901: Thirteen vessels arrived at this port and 11 bills of health were issued. There was 1 death from infantile tetanus. On the 26th, the tug *Humberto Rodriguez* and the barge *San Fernando*, clearing for Tampa, Fla., were disinfected at this place. The sanitary condition of the town is good.

Puerto Padre.—Report shows the arrival of 5 vessels, the issuance of 5 bills of health, 1 death from pernicious fever, and good sanitary condition.

Gibara.—Report shows the arrival of 12 vessels, the issuance of 11 bills of health, 3 deaths—1 tubercular meningitis, 1 pulmonary tuberculosis, and 1 puerperal septicaemia. Sanitary condition, good.

Baracoa.—Report shows the arrival of 7 vessels, the issuance of 6 bills of health, and 3 deaths—1 dentition, 1 pulmonary tuberculosis, and 1 malarial fever. Good sanitary condition. No quarantinable disease is reported at any point in the district.

Respectfully,

OWEN W. STONE,

Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL, *U. S. Marine-Hospital Service.*

Report from Nuevitas, Puerto Padre, Gibara, Banes, and Baracoa.

NUEVITAS, CUBA, October 7, 1901.

SIR: Through the chief quarantine officer for the island of Cuba, I have the honor to submit the following report for the week ended October 5, 1901: Nine vessels arrived at this port, and 7 bills of health were issued. There was 1 death from pneumonia. The sanitary condition of the town is good.

Puerto Padre.—Report shows the arrival of 6 vessels, the issuance of 5 bills of health, and 2 deaths—tetanus, 1; malarial fever, 1—and good sanitary condition.

Gibara.—Report shows the arrival of 10 vessels, the issuance of 12 bills of health, no deaths, and good sanitary condition.

Banes.—Report shows the arrival of 4 vessels, the issuance of 5 bills of health, 1 death from malarial fever, and good sanitary condition.

Baracoa.—Report shows the arrival of 5 vessels, the issuance of 7 bills of health, 1 death from tuberculosis, and good sanitary condition. There is no report of quarantinable disease at any point in the district.

Respectfully,

OWEN W. STONE,

Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

*U. S. Marine-Hospital Service.**Reports from Santiago, Manzanillo, Guantanamo, and Daiquiri—A death from acute nephritis resembling yellow fever.*

SANTIAGO DE CUBA, October 1, 1901.

SIR: Through the chief quarantine officer for the island of Cuba, I have the honor to transmit herewith the following report for the week ended September 21, 1901:

Santiago.—During this period there was a total of 16 deaths reported, making the annual rate of mortality 19.34 per 1,000 for the week. The causes of death were the following: Fever, intermittent malarial, 2; meningitis, 1; cerebral congestion and hemorrhage, 1; tetanus, 1; embolus, 1; bronchitis, acute, 1; pneumonia, 1; diarrhea and enteritis (under 2 years), 1; diarrhea and enteritis (2 years and over), 1; peritonitis, 1; Bright's disease, 1; affections of the bones (nontuberculous), 1; suicide by poison, 1; unspecified or ill-defined causes of death, 2. Total, 16.

During the week 8 vessels were inspected and passed on arrival, of which 1 was placed in quarantine the morning after arrival; 5 vessels were passed without inspection, and 8 vessels leaving this port were given bills of health.

On September 16, 1901, the provisional flag steamship *Julia* was disinfected prior to departure for Porto Rico. During the same week 10 immune and 92 nonimmune certificates were issued to passengers leaving this port.

On September 19, 1901, a message was received from Acting Asst. Surg. Juan J. de Jongh, at Daiquiri that a case under his observation and diagnosed by him as yellow fever on September 12, 1901, would probably die. In the afternoon I proceeded to Daiquiri in company with Major Carr and arrived there at 6 p. m. The man died at 2 p. m.

The following are my notes of the necropsy: Body, well nourished; weight, approximately 160 pounds; hair, gray; approximate age, 45 years; face, livid; conjunctiva, clear; pupils, dilated; lips, blue; gums, pale and hard; signs of hemorrhagic spots disappeared; post-

mortem stasis over back; pallor over entire body; incision into abdomen 20 inches—plenty of fat and oozing of blood in incision; intestine distended and moist; liver slate colored, about normal in size—incision shows much blood and reddish brown; gall bladder full of bile; spleen about normal; stomach distended, no fluid, pale, no hemorrhagic spots or signs of congestion; mucous membrane, normal; duodenum normal; kidneys about twice normal size and indications of acute nephritis. Pressed for time and not enough light, inconvenient to make further examination. We all agreed that death was due to acute parenchymatous nephritis, with congestion of the liver.

The history of the illness of this man is as follows: Jose Iglesias Pardo, age 47 years, white, born in Spain, came to this island when 15 years of age, and suffered an attack of yellow fever a year after his arrival. He remained until 26 years of age when he returned to Spain. After nine years he returned to this island where he suffered no illness for three years. He again returned to Spain, remaining six years. Then he returned to the island, remaining eighteen months in Havana and five months in Santiago. During this period he suffered from no illness. On September 1, 1901, he arrived at the Daiquiri mines. On September 7, 1901, he had a severe chill, headache, pain in the back, and bilious vomit. Temperature 39° C. The following morning the temperature was 41° C. On September 10, temperature, 37.5° C.; whole body was a deep icteric hue; vomited bile; 15 grains of quinine administered. At 12 noon temperature 39.2° C., in the evening 40° C. September 11, temperature, 39° C.; pulse, 110; has hiccough and vomiting of green bile. Icteric appearance disappeared after free catharsis. Three p. m., temperature, 35° C.; pulse, 60; anuria. September 12, temperature, 35° C.; pulse, 58; hiccough. Fifty grammes of urine obtained by catheter, contains albumen. Bilious vomit and diarrhea, containing considerable bile.

Between September 13 and September 19 his temperature ranged between 35° and 36° C., pulse between 40 and 78. Very little urine was secreted for this period. Considerable albumin present. Ecchymotic spots on back and scrotum. Quinine and stimulants administered.

This man was seen by me on September 13, sixth day of illness, in company with Major Carr and Dr. Shimer. The patient was isolated in a tent, far removed from the hospital. He was restless. Temperature, 36° C.; pulse, 64. Large ecchymotic spots were found in the middle of the back and testicles. One small spot was seen on eyelid. Eyes not clear, tongue clean, gums hard, pain in upper part of abdomen. Had a stool which contained considerable bile. Urine contained albumin.

I was inclined to the belief that this man had yellow fever, but reserved my opinion as I thought there was too much bile during the whole illness to be yellow fever, besides the temperature record would indicate a grave case and should have had every symptom of yellow fever prominent, which was not the case. I returned to Santiago the following morning.

This patient died, as already stated, on the 19th.

After the necropsy I returned to Santiago on the 20th, when it was reported that the British steamship *Ethelbryht* arrived on the previous day with 3 sick aboard and that 1 had died during the night. The history of this vessel and subsequent developments will be made the subject of a separate report.

Manzanillo.—Acting Asst. Surg. R. de Socarras reports a total of 8

deaths during the week, an annual rate of mortality of 28.07 per 1,000. The causes of death were the following: Fever, intermittent malarial, 1; cerebral softening, 1; broncho-pneumonia, 1; diarrhea and enteritis (2 years and over), 3; ill-defined or unspecified causes of death, 2. Total, 8. During the same week 6 vessels were inspected and passed on arrival, 2 vessels were passed without inspection, and 7 bills of health were issued to vessels leaving this port.

Guantanamo.—Acting Asst. Surg. Luis Espin reports 3 deaths, due to the following causes: Tubercle of lungs, 2; organic diseases of the heart, 1. Total, 3. Annual rate of mortality for the week, 8.66 per 1,000. During the week 2 vessels were inspected and passed on arrival, 3 vessels were passed without inspection, and 5 vessels leaving this port received bills of health.

Daiquiri.—Acting Asst. Surg. Juan J. de Jongh reports 1 death, due to acute nephritis. During the week 2 vessels were inspected and passed, and 1 vessel received bill of health.

Respectfully,

R. H. VON EZDORF,
Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

GERMANY.

Report from Berlin—Plague and cholera in various countries.

BERLIN, GERMANY, October 7, 1901.

SIR: I have the honor to transmit the following information, obtained from the imperial health office at Berlin:

Plague.

ITALY.—During the night of September 23, 12 cases of a disease supposed to be bubonic plague were reported to the sanitary authorities at Naples. All the cases occurred among the laboring population at Punto Franco, and up to September 28 none had been recorded among the inhabitants of the city proper.

FRANCE.—According to a communication dated September 25, 2 of the crew of the steamer *Senegal* died in Marseilles of a disease suspected to be plague.

EGYPT.—During the period from September 13 to September 19, 8 plague cases and 6 deaths were recorded for the whole of Egypt, viz, 3 cases and 1 death in Alexandria, 3 cases and 2 deaths at Port Said, 3 cases and 2 deaths at Mit Gamr, and 1 case and 1 death in Benha.

BRITISH EAST INDIES.—During the week ended August 30 there were registered in the Bombay Presidency 5,420 new plague cases and 3,757 deaths—that is to say, 1,132 more cases and 720 more deaths than during the foregoing week. In the city of Bombay during the week ended August 31 there were 189 fresh cases and 228 deaths of plague. The number of deaths from suspected plague amounted to 179. Total number of deaths in the city from all causes, 907.

CHINA—*Hongkong*.—Although the colonial government, according to an official communication dated August 22, considers the plague epidemic as stamped out, there occurred, during the period from August 3 to August 10, 10 new plague cases and 12 deaths, and from August 10 to August 17, 4 cases and 5 deaths, and since then up to August 23, 2 cases and 2 deaths. All these cases were among the Chinese population. The permission has been granted to the Chinese, at their request, to place their dead in fatal plague cases in coffins according to Chinese rites and remove them from Hongkong.

MAURITIUS.—During the period from July 12 to August 1, 2 fresh plague cases and 2 deaths occurred on the island. No further case of plague was noted during the first week of August.

CAPE COLONY.—During the week ended August 31, 4 patients were taken in at the plague hospital at Port Elizabeth, whereby the total number of cases has risen to 57. Number of deaths of plague during the same period, 3. On the Cape peninsula, there are still 10 plague patients under medical treatment, and 89 persons in the contact camps.

QUEENSLAND.—During the weeks ended August 3 and August 10, no new cases of plague were recorded in the colony. In the week ended August 17, 1 case occurred with fatal termination.

NEW CALEDONIA.—During the period from August 12 to September 15, there occurred in Numea 26 cases of plague and 7 deaths.

Plague and cholera.

BRITISH INDIA.—In Calcutta during the period from August 18 to August 24, 10 persons died of cholera, and there were 22 cases of bubonic plague with 22 deaths.

Cholera.

DUTCH INDIA.—During the period from July 27 to August 21, there occurred 93 cases of cholera and 66 deaths in the town of Samarang and suburbs.

Respectfully,

FRANK H. MASON,
United States Consul-General.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

Quarantine measures against plague.

BERLIN, GERMANY, October 7, 1901.

SIR: I have the pleasure to transmit the following information obtained from the imperial health office at Berlin:

Temporary measures against plague.

GERMAN EMPIRE.—The imperial chancellor (imperial ministry of the interior) has issued a circular-communication, dated September 27, directing the governments of the federal maritime States to see that ships from Naples arriving at German ports are subjected to the control of the sanitary police in accordance with the prescriptions which have been agreed upon by the federal maritime States.

ITALY.—Ships sailing from Naples, according to a communication dated September 27, are examined by the medical officers and all the rats found on board are killed. Immediately on the arrival of such ships at other Italian ports the passengers must undergo a medical examination, and the vessels are thoroughly disinfected. Furthermore, travelers landing must report themselves to the authorities at the place of destination in order that a seven-days' surveillance may be exercised. The making fast of the vessels to the landing stages by means of bridges is prohibited. Cables and anchor chains must be equipped with devices for preventing rats from crossing over them. These prescriptions are not enforced against vessels which on leaving Naples have fully complied with the quarantine regulations. A prohibition of exports from the port of Naples has been put in force in accordance with the edicts of the sanitary police, No. 3, of May 8, 1897. Parcels and samples of goods are excepted from this prohibition if they are packed in tarred sacks.

HOLLAND.—A decree of the minister of the interior, dated September 21, based on the royal edict of September 12, forbids the importation of rags, worn garments, and soiled linen from Bombay, Calcutta, Cape Town, and Port Elizabeth. Travelers' baggage falls under this prohibition so far as it relates to unwashed body and bed linen.

Respectfully,

FRANK H. MASON,
United States Consul-General.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

Sanitary condition of Berlin.

BERLIN, GERMANY, October 10, 1901.

SIR: I have the honor to submit the following health statistics as published in the Berlin Lokal Anzeiger of this date:

The sanitary condition of Berlin was somewhat less favorable during the week ended September 28, than in the foregoing week. The mortality was also higher, being 16.4 per 1,000. More than half of the large German cities, as well as Copenhagen and Stockholm, had a higher rate of mortality than Berlin. Of the 601 deaths registered during the week, 200 were children in their first year. The increase in the number of deaths by 42 as compared with the previous week was due, for the most part, to the more frequent deaths among sucklings. Among persons of more advanced age, no important difference in the rate of mortality was to be noted. Acute diseases of the intestines still continue to claim the greatest number of victims (80). They were, however, less frequent than during the foregoing week, and remained for the first time since the beginning of July under the average mortality rate. Acute diseases of the respiratory organs, of which 42 persons died, were also less frequent than in the third September week. Up to this date only a few sporadic cases of influenza have occurred; 2 cases, however, ended in death. There were also 59 deaths from consumption. Cases of measles were few, causing only 1 death as compared with 4 deaths in the foregoing week. There were 24 cases of typhoid fever, but 7 of the 65 patients of the two previous weeks died. The cases of scarlet fever (35), and diphtheria (62), were also less than in the foregoing week, but the deaths from scarlet fever increased to 11, and from diphtheria to 16. Seventeen persons died a violent death, of which 8 perished by suicide.

Respectfully,

FRANK H. MASON,
United States Consul-General at Berlin.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

Plague in Italy—Typhoid fever in Gelsenkirchen.

[Clipping from the Berlin Lokal-Anzeiger, October 8, 1901.]

The plague in Naples.

BERLIN, GERMANY, October 8, 1901.

ITALY.—Yesterday, unhappily, a new case of plague was reported. A correspondent wires us from Naples that the patient, a young girl, was taken to the hospital at Nisida, her relatives have been isolated and the house in which they lived has been disinfected. With the exception of this one, no further case has occurred either in Naples or in the province. All the isolated persons are well and some of them have already been released from surveillance.

GERMAN EMPIRE.—The total number of cases of typhoid officially reported at Gelsenkirchen increased in the period from the 3d to the 7th of this month from 781 to 947.

FRANK H. MASON,
United States Consul-General.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

GIBRALTAR.

Naples declared to be infected with plague.

GIBRALTAR, September 26, 1901.

The following appeared in the Official Gazette September 2, 1901:

BOARD OF HEALTH NOTICE.

The board of health, having received information of the outbreak of plague at Naples, have this day declared that place to be an infected port.

By order.

JOHN C. KING,
Secretary to the Board of Health.

GUATEMALA.

Report from Livingston—Fruit port.

LIVINGSTON, GUATEMALA, October 10, 1901.

SIR: I have to make the following report of the conditions and transactions at this port during the week ended October 9, 1901:

Present officially estimated population, 3,000. Number of cases and deaths from yellow fever during the week, none; number of cases and deaths from smallpox during the week, none; number of cases and deaths from typhus fever during the week, none; number of cases and deaths from cholera during the week, none; number of cases and deaths from plague during the week, none; number of deaths from other causes during the week, none. Prevailing diseases, malarial. General sanitary condition of this port and the surrounding country during the week, good, excepting malarial fevers, of which this place has had a saturnalia for more than a fortnight—more than the oldest inhabitant remembers.

Bills of health were issued to the following vessels: October 10, steamship *Bergenseren*; crew, 16; passengers from this port, none; passengers in transit, none; pieces of baggage disinfected, none; steamship *S. Oteri*; crew, 34; passengers from this port, none; passengers in transit, 16; pieces of baggage disinfected, none.

Respectfully,

W. K. FORT,
Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

HONDURAS.

Report from Puerto Cortez—Fruit port.

PUERTO CORTEZ, HONDURAS, October 8, 1901.

SIR: I have to make the following report of the conditions and transactions at this port during the week ended October 8, 1901:

Population according to census of 1896, 1,856; present officially esti-

mated population, 2,000. Number of cases and deaths from yellow fever during the week, none; number of cases and deaths from smallpox during the week, none; number of cases and deaths from typhus fever during the week, none; number of cases and deaths from cholera during the week, none; number of cases and deaths from plague during the week, none; number of deaths from other causes during the week, none; prevailing diseases, malarial fever and measles. General sanitary condition of this port and the surrounding country during the week, very good.

Bills of health were issued to the following vessels: October 2, steamship *Ruselin*; crew, 43; passengers from this port, 3; passengers in transit, 1; pieces of baggage disinfected, 5. October 6, steamship *Bratten*; crew, 15; passengers from this port, none; passengers in transit, none; pieces of baggage disinfected, none.

Respectfully,

SAMUEL HARRIS BACKUS,

Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

ITALY.

Concerning the steamship Bolivia from Naples to New York.

NAPLES, ITALY, October 2, 1901.

SIR: I have the honor to inform you that the steamship *Bolivia* left this port yesterday with 339 emigrants for New York. The captain was given a sealed letter addressed to the quarantine officer, port of New York, as follows:

"In regard to the steamship *Bolivia* leaving this port to-day for New York, I have to inform you that while at Naples the vessel lay off from the wharf; that communication with the shore was under my supervision; that the cargo was subjected to careful scrutiny and that all the crew and steerage passengers were submitted to a medical examination. The temperature of the crew and steerage passengers was taken and all persons having a temperature above normal were detained.

"All baggage of the steerage passengers was disinfected in accordance with the regulations of the U. S. Marine-Hospital Service. In short, the regulations of the U. S. Marine-Hospital Service, qualified by official amendments and additions and by telegraphic instructions received September 28, 1901, from the Supervising Surgeon-General, U. S. Marine-Hospital Service, were strictly complied with.

"Vaccination was omitted in compliance with paragraph 16, Article V, additions to regulations to be observed at foreign ports and at sea, Treasury Department Circular, No. 6, dated January 16, 1900.

"The number of cases and deaths from quarantinable diseases is given in the accompanying bill of health.

"In addition, I have to inform you that the plague existing at Naples originated at the Government warehouses in the port and that cases have appeared in several parts of Naples. Stringent sanitary measures have been taken by the authorities at Naples."

Respectfully,

J. M. EAGER,

Passed Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

Reports from Naples—Plague and smallpox.

NAPLES, ITALY, October 7, 1901.

SIR: I have the honor to report that for the week ended October 5, 1901, the following ships were inspected:

September 29, the steamship *Patria*, of the Fabre Line, bound with passengers and cargo for New York. There were inspected and passed 620 steerage passengers. Eight hundred and eighty-two pieces of baggage were disinfected by steam.

October 1, the steamship *Bolivia*, of the Anchor Line, bound with passengers and cargo for New York. There were inspected and passed 339 steerage passengers. Four hundred and forty-five pieces of baggage were disinfected by steam.

October 5, the steamship *Trojan Prince*, of the Prince Line, bound with passengers and cargo for New York. There were inspected and passed 304 steerage passengers. Six hundred and forty-eight pieces of baggage were disinfected by steam.

Inspections at Palermo.

At Palermo for the week ended October 5, 1901, the following ships were inspected:

October 2, the steamship *Manilla*, of the Italian General Navigation Company, bound with passengers and cargo for New Orleans. There were inspected and passed 1,081 steerage passengers and 380 pieces of large and 1,900 pieces of small baggage. One hundred and twelve pieces of baggage were disinfected by steam.

October 4, the steamship *Sicilia*, of the Italian General Navigation Company, bound with passengers and cargo for New York. There were inspected and passed 725 steerage passengers and 280 pieces of large and 1,300 pieces of small baggage. Two hundred and fifty pieces of baggage were disinfected by steam.

Plague at Naples.

During the week ended October 5, 1901, there were reported 9 cases and 2 deaths from plague at Naples. In some of the cases the diagnosis has not yet been confirmed by bacteriological examination. The cases are distributed about the city, and not confined to any one locality. Until October 1 it was a matter of considerable comfort to those interested in the welfare of Naples that no cases had occurred, the diagnosis of which was thoroughly confirmed, except among persons exposed to infection at the Government bonded warehouses at the Punto Franco, where the disease is supposed to have entered Naples. A case, however, was reported October 1, in the person of an employee of a flour mill. The man died next day and the diagnosis was so well confirmed bacteriologically that the bacilli gathered from him are being used in the preparation of cultures for the prophylaxis of plague. The mill hand had not been at the Punto Franco, but grain being ground at the mill had come from the bonded warehouse.

At the conclusion of the week covered by this report, there were 9 cases of plague under treatment at the isolation station at the island of Nisida. Those in isolation owing to their having been in contact with infected persons, places, or things, numbered 133.

There is still a question regarding the source of the plague at Naples, but it is generally supposed that the disease was brought here by some

steamship carrying hides from Asia or from Egypt and unloading the cargo at the Punto Franco. Thus other stores in the warehouses became infected and the disease was spread by persons working at the Punto Franco, by goods stored there, and probably by the rats which infested the place.

Plague in Egypt.

Under date of September 30, 1901, it was reported that there were 5 cases of plague throughout Egypt, namely, 3 Europeans and 1 native at Alexandria, and 1 European at Port Said. Since April 7, 1901, when the disease made its appearance, there have been 167 cases with 81 deaths.

Smallpox at Naples.

The situation as regards smallpox at Naples remains about the same as at the time of my last report. I have been unable to learn the exact number of cases and deaths from smallpox during the past week. I have not therefore forwarded the abstract of the bills of health with this letter but will do so as soon as I obtain the figures.

Respectfully,

J. M. EAGER,

Passed Assistant Surgeon, U. S. M. H. S.

The SURGEON GENERAL,

U. S. Marine-Hospital Service.

NAPLES, ITALY, October 7, 1901.

SIR: I have the honor to inform you that the steamship *Trojan Prince*, of the Prince Line, left this port on October 5, 1901, with 304 immigrants for New York. The captain was given a sealed letter addressed to the quarantine officer, port of New York, as follows:

"In regard to the steamship *Trojan Prince* leaving this port to-day for New York, I have to inform you that while at Naples the vessel lay off from the wharf, that communication with the shore was under my supervision, that the cargo was subjected to careful scrutiny, and that all the crew and steerage passengers were submitted to a medical examination. The temperature of the crew and steerage passengers was taken, and all persons having a temperature above normal were detained.

"The regulations of the U. S. Marine-Hospital Service, qualified by official amendments and additions and by telegraphic instructions received September 28, 1901, from the Supervising Surgeon-General, U. S. Marine-Hospital Service, were strictly complied with.

"Vaccination was omitted in compliance with paragraph 16, Article V, addition to regulations to be observed at foreign ports and at sea, Treasury Department Circular, No. 6, dated January 16, 1900.

"The number of cases and deaths from quarantinable diseases is given in the accompanying bill of health.

Plague reported ended.

[Copy of cablegram.]

NAPLES, ITALY, October 16, 1901.

Authorities proclaim plague ended.—EAGER.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

JAPAN.

Report from Yokohama—No plague or cholera in Japan proper.

YOKOHAMA, JAPAN, September 21, 1901.

SIR: I have the honor to notify you that since the report from this office dated September 17 no case of plague, undoubted cholera, or epidemic occurrence of smallpox has been met with in Japan, proper.

Respectfully,

K. ROKKAKU,

Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON GENERAL,
U. S. Marine-Hospital Service.

MEXICO.

Report from Vera Cruz—Yellow fever continues.

VERA CRUZ, MEXICO, October 8, 1901.

SIR: I have the honor to submit the following report for the week ended October 5, 1901:

The death rate of the city, as given by the civil register, shows a considerable increase, 55 deaths being reported during the week. This is the highest mortality report during the last six months.

There were 7 new cases of yellow fever and 4 deaths from the disease. One of the fatal cases was in the person of an American.

The local practitioners are commenting upon the number of cases of pernicious malaria at present in the city. During the week 8 deaths were reported from this disease.

There has been but 1 case of sickness in the harbor. The Norwegian steamer *Tyr* arrived here from Philadelphia and Newport News on September 27 with a case of sickness on board. I saw the case about eight hours after arrival and made a diagnosis of malarial fever. The patient was sent to the hospital for treatment. He was able to sail on the vessel when she cleared for Santiago de Cuba.

The harbor work has been very dull during the past week; only 3 vessels were cleared for United States ports.

I inclose the mortality report for the week.

Respectfully,

D. E. DUDLEY,

Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

Report from Progreso—Yellow fever at Merida and Valladolid.

PROGRESO, MEXICO, September 30, 1901.

SIR: For the week ended September 28, I have the honor to make the following report:

There were no cases nor deaths reported from any contagious disease; 8 deaths from all causes being the mortality of the town during the

week, 4 of which were from malarial fevers. Three deaths from yellow fever were reported in Merida for the period, and 4 in Valladolid. No cases of smallpox were reported in or about Merida, but I am unable to learn anything further about the epidemic in the village west of here. There were no cases of any kind of sickness in the shipping during the week.

Respectfully,

S. H. HODGSON,

Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

NETHERLANDS.

Rio de Janeiro declared infected with plague.

AMSTERDAM, October 2, 1901.

SIR: The minister of the interior of the Netherlands, having received official information that pest prevails at Rio de Janeiro, has, in accordance with the law of March 28, 1877, declared Rio de Janeiro to be infected with pest, and has fixed the quarantine at ten days.

Respectfully,

FRANK D. HILL,

United States Consul.

Hon. ASSISTANT SECRETARY OF STATE.

NICARAGUA.

Report from Bluefields—Fruit port.

BLUEFIELDS, NICARAGUA, October 10, 1901.

SIR: I have to make the following report of the conditions and transactions at this port during the week ended October 10, 1901:

Population, according to census of 1894, 3,000; present officially estimated population, 4,000. Number of cases and deaths from yellow fever during the week, none; number of cases and deaths from smallpox during the week, none; number of cases and deaths from typhus fever during the week, none; number of cases and deaths from cholera during the week, none; number of cases and deaths from plague during the week, none; number of deaths from other causes during the week, 4. Prevailing disease, mild type of malarial fever. General sanitary condition of this port and the surrounding country during the week, was good. Four deaths occurred in this town, namely, a colored male, aged 15 days, from malarial fever; a colored female, aged 6 months, from cholera infantum; a colored male, aged 39 years, from malarial fever; and a colored female, aged 30 years, cause not specified, but positively known to be due to a chronic disease.

Bills of health were issued to the following vessels: October 3, steamship *Hiram*; crew, 15; passengers from this port, 8; passengers in transit, none; pieces of baggage disinfected, 9. October 6, steamship

Condor; crew, 16; passengers from this port, none; passengers in transit, none; pieces of baggage disinfected, none.

Respectfully,

WM. H. CARSON,

Acting Assistant Surgeon. U. S. M. H. S.

The SURGEON-GENERAL,

PORTO RICO.

Report from San Juan and subports for September, 1901.

SAN JUAN, P. R., October 7, 1901.

SIR: I have the honor to transmit herewith the following report of the transactions of the Service at this and the 6 subports of the island of Porto Rico for the month of September, 1901:

San Juan.—Number of vessels inspected, 14; number of bills of health issued, 21; number of pieces of baggage disinfected, 76; number of pieces of mail disinfected, 4; number of persons detained in quarantine, 1; number of vessels disinfected, none.

On the 16th instant the French steamship *Saint Simon* arrived from St. Marc, Gonaives, Port au Prince, and Cape Haitien. She carried no passengers or cargo for this port. One sack of mail was disinfected here, and the vessel held in quarantine while at this port.

On the 18th instant the Spanish steamship *Cataluña* entered from Havana, Port Limon, Colon, Barranquilla, Puerto Cabello, La Guayra-via Ponce. All passengers for Porto Rico being immune were permitted to land. Six pieces of baggage and one sack of mail were taken to the island and disinfected. The vessel was held in quarantine under guard while she remained in this port.

The provisional flag steamship *Julia* arrived here on the 20th instant

from Cuban and Dominican ports via Ponce and Mayaguez. She had undergone her usual disinfection at Santiago de Cuba. One passenger, who embarked on the steamer at Havana, was held in quarantine here to complete the required observation period, as he was unable to produce satisfactory evidence of immunity. Twenty-nine pieces of baggage and 1 sack of mail from this steamer were taken to the island and subjected to disinfection. The vessel was granted free pratique.

The provisional flag steamship *Maria Herrera*, from Cuban and Dominican ports, arrived on the 29th instant. She had been disinfected at Santiago as usual, and as all passengers for Porto Rico were immune they were allowed to land. One sack of mail from Puerto Plata and 41 pieces of baggage were removed to the island and disinfected before delivery.

I inclose herein the vital statistics for San Juan.

The following report comprises a summary of the work done at the several subports during the month: Vessels inspected at Mayaguez, 7; Arecibo, 3; Humacao, 2; Aguadilla, 2; Fajardo, none; Arroyo, none.

The following is the mortality report from the subports: Mayaguez, 108; Arecibo, 96; Humacao, 36; Aguadilla, 28; Fajardo, 25; Arroyo, 15.

Respectfully,

H. S. MATHEWSON,

Passed Assistant Surgeon, U. S. M. H. S.,

Chief Quarantine Officer for Porto Rico.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

Total number of immigrants inspected, 54; number passed, 53; number certified for deportation on account of dangerous contagious or loathsome diseases, or for other physical causes, 1.

Respectfully,

H. S. MATHEWSON,
*Passed Assistant Surgeon, U. S. M. H. S.,
Chief Quarantine Officer for Porto Rico.*

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

Reports from Ponce—Weekly and monthly.

PONCE, P. R., *September 30, 1901.*

SIR: Through the chief quarantine officer for Porto Rico, I have the honor to transmit herewith the quarantine and abstract of bills of health reports for the week ended September 28, 1901. One vessel was inspected and passed and 5 bills of health were issued.

On the 28th instant, the American steamship *Californian* sailed from this port with 274 emigrants for Hawaii via New Orleans.

According to the official reports of the board of health, the city and district is free from any quarantine disease.

Respectfully,

W. W. KING,
Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

PONCE, P. R., *October 7, 1901.*

SIR: Through the chief quarantine officer for Porto Rico I have the honor to transmit herewith the regular quarantine and abstract of bills of health reports for the week ended October 5, 1901; also the summary of transactions and report of the inspection of immigrants for the month of September, 1901.

Of 7 vessels arriving during the week, 6 were inspected and passed, and 1 held in quarantine, transacting business under guard. This vessel, Spanish steamship *Ramon de Larrinaga*, from Liverpool via Cape Haitien, Port-au-Prince, Jeremie, Aux Cayes, Jacmel, Santo Domingo, Sanchez, Puerto Plata, and Mayaguez, brought a bill of health from Cape Haitien, Haiti, showing 1 case of yellow fever in that town. She cleared for San Juan, P. R., after discharging cargo

from Liverpool, and 3 passengers from Santo Domingo. Their baggage, 4 pieces, was disinfected. Four bills of health were issued during the week.

Respectfully,

The SURGEON-GENERAL,
U. S. Marine Hospital Service.

W. W. KING,
Assistant Surgeon, U. S. M. H. S.

Respectfully,

The SURGEON-GENERAL,
U. S. Marine Hospital Service.

W. W. KING,
Assistant Surgeon, U. S. M. H. S.

Report of immigrants inspected at the subports of Porto Rico during the month of September, 1901.

Total number of immigrants inspected, 15 (at Mayaguez); number passed, 15 (at Mayaguez).

H. S. MATHEWSON,
Passed Assistant Surgeon, U. S. M. H. S.,
Chief Quarantine Officer for Porto Rico.

The SURGEON-GENERAL,
U. S. Marine Hospital Service.

Inspection of immigrants at Ponce during the week ended October 5, 1901.

PONCE, P. R., October 7, 1901.

SIR: Through the chief quarantine officer for Porto Rico, I submit herewith report of alien steerage passengers arriving at this port during the week ended October 5, 1901. October 1, Spanish steam-

ship *Catalina*, from Genoa, Marseilles, Barcelona, La Palma, Valencia, Torrevieja, Malaga, Cadiz, Canaries, with 1 immigrant. October 5, French steamship *St. Domingo*, from Fort de France and St. Thomas, with 1 immigrant. Total, 2.

Respectfully,

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

W. W. KING,
Assistant Surgeon, U. S. M. H. S.

TURKEY.

Plague at Samsoun.

WASHINGTON, D. C., *October 14, 1901.*

SIR: I have the honor to inform you that a telegram of the 11th instant has been received from the consul at Sivas which reads as follows, viz:

"Plague reported Samsoun, Turkey."

Respectfully,

DAVID J. HILL,
Acting Secretary.

HON. SECRETARY OF THE TREASURY.

Foreign and insular statistical reports of countries and cities—Yearly and monthly.

CANADA—*British Columbia—Victoria.*—Month of September, 1901. Estimated population, 20,000. Total number of deaths, 11, including 2 from diphtheria.

Province of Ontario.—Reports to the provincial board of Health for the month of August, 1901, from 714 municipalities having an aggregate estimated population of 2,000,946, show a total of 1,928 deaths, including diphtheria, 16; enteric fever, 30; measles, 3; scarlet fever, 8; whooping cough, 12, and 171 from tuberculosis.

DUTCH GUIANA—*Paramaribo.*—Month of August, 1901. Estimated population, 31,427. Total number of deaths, 92. No deaths from contagious diseases reported.

GREAT BRITAIN—*England and Wales.*—The deaths registered in 33 great towns in England and Wales during the week ended September 28, 1901, correspond to an annual rate of 16.7 per 1,000 of the aggregate population, which is estimated at 11,463,026. The highest rate was recorded in Sunderland, viz, 27.3, and the lowest in Leicester, viz, 9.6.

London.—One thousand three hundred and four deaths were registered during the week, including measles, 13; scarlet fever, 13; diphtheria, 34; whooping cough, 13; enteric fever, 19; smallpox, 5, and diarrhea and dysentery, 87. The deaths from all causes correspond to an annual rate of 15.0 per 1,000. In Greater London 1,759 deaths were registered, corresponding to an annual rate of 13.9 per 1,000 of the population. In the "outer ring" the deaths included 19 from diphtheria, 6 from measles, 3 from scarlet fever, 1 from smallpox, and 6 from whooping cough.

Ireland.—The average annual death rate represented by the deaths

registered during the week ended September 28, 1901, in the 21 principal town districts of Ireland was 18.6 per 1,000 of the population, which is estimated at 1,079,708. The lowest rate was recorded in Lisburn, viz, 9.1, and the highest in Galway, viz, 31.1 per 1,000. In Dublin, and suburbs 133 deaths were registered, including enteric fever, 3; scarlet fever, 1, and 1 from whooping cough.

Scotland.—The deaths registered in 8 principal towns during the week ended September 28, 1901, correspond to an annual rate of 16.0 per 1,000 of the population, which is estimated at 1,656,525. The lowest mortality was recorded in Paisley, viz, 12.4, and the highest in Dundee, viz, 18.7 per 1,000. The aggregate number of deaths registered from all causes was 509, including diphtheria, 1; measles, 12; scarlet fever, 4, and 7 from whooping cough.

JAMAICA—Port Antonio.—Two weeks ended October 5, 1901. Estimated population not reported. No deaths and no contagious diseases.

JAVA—Batavia.—Two weeks ended August 31, 1901. Estimated population, 150,000. Total number of deaths not reported. Twelve deaths from cholera reported.

SPAIN—Corunna.—Month of September, 1901. Estimated population, 40,500. Total number of deaths, 122, including enteric fever, 2; typhus, 1, and 22 from tuberculosis.

Madrid.—Year ended December 31, 1900. Estimated population, 470,283. Total number of deaths, 17,379, including measles, 777; small-pox, 1,055, and 1,289 from tuberculosis.

WEST INDIES—St. Thomas.—Month of September, 1901. Estimated population, 11,012. Total number of deaths, 23. No contagious diseases.

Cholera, yellow fever, plague, and smallpox, June 28, 1901, to October 25, 1901.

[Reports received by the Surgeon-General United States Marine-Hospital Service from United States consuls through the Department of State and other sources.]

[For reports received from December 28, 1900, to June 28, 1901, see PUBLIC HEALTH REPORTS for June 28, 1901.]
